EDUCATION

Delhi Technological University

Bachelor of Technology in Computer Science Engineering

Aug. 2023 – May 2027

CGPA: 8.76

EXPERIENCE

Full Stack Developer Intern

Jan 2026 – Mar 2026

NPTEL, IIT Ropar

- Developed **Vi-Notes**, a MERN-based authorship verification platform detecting AI-assisted writing using behavioral typing analysis.
- Implemented **JWT + OAuth2 authentication with role-based access control**, securing user-specific note management.

PROJECTS

OmniDraft - Live Collaborative Workspace | React.js, Spring Boot, Kafka, Redis, PostgreSQL, MongoDB, Docker

- Developed a microservices-based real-time collaboration platform supporting concurrent document editing, team chat, and **1000+ concurrent connections**.
- Architected an event-driven system using Kafka and Redis-backed WebSockets to enable low-latency synchronization across distributed services.
- Containerized **8 microservices** with Docker and implemented hybrid persistence (PostgreSQL/MongoDB), improving API response time by **40%**.

Wild Oasis - Full-Stack Hotel Management System | React, Next.js, Supabase, Styled Components, Tailwind CSS

- Architected a dual-app ecosystem using **React and Next.js** to cut load times by **40%**, utilizing the Compound Component Pattern to build a scalable, theme-aware Design System.
- Engineered a robust data layer with **Supabase and TanStack Query**, implementing advanced caching strategies that reduced redundant API traffic by **50%** across 10+ relational tables.
- Enhanced operational efficiency by designing a **URL-driven state management system**, ensuring 100% filter persistence and deep-linking capabilities for 500+ dynamic booking entries.

Natours - Full-Stack Travel Platform | Node.js, Express.js, MongoDB, Mongoose, Stripe, JWT, SASS/SCSS

- Architected a high-performance RESTful API with a custom factory-pattern query engine, reducing boilerplate by **45%** and achieving sub-100ms response times.
- Developed a responsive frontend using advanced SASS/SCSS patterns (BEM, 7-1 Pattern), implementing complex CSS animations and modular components for optimized asset loading.
- Hardened system security and database performance via JWT, rate-limiting, and 2dsphere indexing, mitigating **100%** of OWASP threats and cutting payloads by **60%**.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript/TypeScript, HTML/CSS, Solidity, Dart

Frameworks & Technologies: Next.js, React, Spring Boot, Node.js, Express.js, Flask, Flutter

Databases & Storage: PostgreSQL, MongoDB, Redis, Supabase, Firebase

Machine Learning: Transformers, Graph Neural Networks, Tensorflow, Pytorch, NumPy, pandas

Developer Tools: Git/Github, Docker, VS Code, Postman, Figma

ACADEMIC ACHIEVEMENTS AND AWARDS

- Solved **1000+** Data Structures and Algorithms problems on LeetCode and Codeforces.
- Rank **1st** in 10th at school level for academic excellence.

POSITIONS OF RESPONSIBILITY

Google Developer Student Clubs (GDSC)

App Development Team

Aug 2023 – May 2025

- Orchestrated recruitment drives and conducted interviews to scale the core developer team while leading technical initiatives.
